Mohammed Rahil Ali
College Of Dentistry Dean**

Dean of Dental College speech

- In the philosophy of education, the student is considered the focus of the educational process, and a successful educational institution is one that can make the student a specialized, competent and successful element, not only in serving the community but also in leading it. The ambition of our college is to graduate a dentist who is scientifically successful and able to make a difference in the field of his noble profession. In order for the student to have this positive role in his community, the educational process directed towards him must also be positive. Therefore, our college, represented by its faculty and staff, always aims to cooperate with the student and the labor market for the purpose of producing valuable outputs characterized by quality and mastery, namely the scientific and practical experience of the college graduate. From my humble position in the leadership of the college, I put all my experience and information, in addition to my educational efforts, in the service of these lofty goals, side by side with all the instructors and affiliates, without whom the educational process would not have reached this level of maturity.

I thank everyone who helps me in these goals and I invite others to support me..

- With appreciation

Council Of Dental College

Speech Of Assistant Dean For Scientific Affairs

The College of Dentistry is one of the important institutions in our university. You represent one of the distinguished segments of society, as you are the builders of society and the doctors of the future. I hope that you will be up to the responsibility placed on your shoulders through your perseverance in receiving knowledge and your discipline in achieving the desired, mixed with the same amount of ethics and humanity, to be the essence of a successful doctor and therapist.

Dear students, your choice of the College of Dentistry places many tasks on your shoulders and the path is not easy to overcome, as it requires patience, determination and resolve to overcome obstacles. We always work with you to alleviate all the obstacles you face. Our ambition is for you to excel and open many horizons for you in the field of dentistry. Some of you will be treating doctors in one of the medical centers of our beloved country, serving our citizens with your knowledge and following up on the continuous developments in modern technologies used in treatment. Some of you seek to pursue postgraduate studies to become a scientist in your field of specialization. We are all hopeful for you, as you represent our bright future. With you, the college advances, as you are the tool by which it achieves its vision, mission and goals. I wish you all success and prosperity and to achieve a bright tomorrow.

Assistant Dr. Ahmed Ibrahim
Khalaf

Assistant Dean For Scientific
Affairs

Speech Of Assistant Dean For Administrative Affairs

This year, we seek to pay great attention to the educational process, raise the level of general performance, and complete the projects that we have started. Within the framework of our keenness on continuous development, we have developed precise executive plans that are compatible with the new variables according to quality standards. Because we look to the future, we find that we have a lot of work to accomplish. We have a message that we seek to achieve, which is to graduate students at the highest level scientifically, skillfully, and behaviorally. We have a message that we must achieve, which is to reach the furthest possible point in the space of development during the coming years. This will only come about through a strategy that relies on advanced skills in teaching, scientific methodology in research, and technical performance in management. The goal of the College of Dentistry is to bring about continuous development in a way that achieves a decisive and promising leadership in its present and future. The college administration seeks, in continuous work and diligent effort, to advance the college's buildings, equipment, halls, capabilities, administration, laboratories, clinics, and to provide supplies and services. This is not an easy task in light of the high cost of all educational requirements. The college's mission includes education, training and treatment. It receives large numbers of citizens daily for free treatment, whether adults or children, at the college's teaching hospital. It also receives school students and visits to the orphanage. The college is preparing to complete its facilities and equipment and achieve quality and accreditation standards in education and treatment, which is what we strive for and hope to achieve in the near future.

Branchs and Departments In The College

Dental Industry Branch

The Dental Industry Branch seeks to train the student to replace partially or completely lost teeth with removable prostheses, with knowledge of the appropriate designs for prostheses in each case. In the case of complete tooth loss, the student is trained to replace them with complete removable prostheses, with an understanding of the occlusion and aesthetic appearance of the teeth, and cases of replacing missing parts of the face and jaws as a result of surgical operations and deformities.

Laboratories Building**

Periodontics and Dental Surgery branch

The branch was established in the academic year 2005-2006. The branch specializes in teaching students to treat all gum diseases and remove calcifications, pigments and tartar deposits from the surfaces of teeth and gums. It also trains students on modern methods of diagnosing diseases that affect the tissues around the teeth and how to perform treatments.

Training is conducted in the fourth and fifth stages. Special cards are organized for citizens who visit to examine the tissues and around the teeth and provide advice, guidance and the correct way to use the brush and dental floss and the number of times to use them and perform surgical interventions to correct the position and shape of the tissues and around the teeth in the event that non-surgical methods are not sufficient.

Hospital University /Fifth Stage Clinic

Assistant Prof. Dr. Intisar Jassim Mohammed /The Head of Oral Diagnosis

Oral Diagnosis Branch

One of the important scientific branches in the College of Dentistry. It is a solid scientific and practical specialty based on the diagnosis and treatment of oral conditions and diseases, continuous follow-up of the patient's condition, and community service to graduate a qualified scientific cadre to communicate with all developments in dental sciences. It is concerned with studying, knowing, and explaining the causes leading to the patient and the apparent signs of disease, how to diagnose the disease, provide the necessary treatment, explain methods of disease prevention, and provide the necessary medical advice. The branch was established on 5/16/2007.

Scientific Units

The Oral Diagnosis Department consists of four scientific units:

- 1. Oral Medicine Unit:** This department performs external local diagnosis of diseases affecting the mouth, treats emergency cases, and provides the necessary medical advice to maintain oral and dental health and prevent diseases.
- 2. Oral Tissue Unit:** This specialty studies the basic components of cells and tissues of the mouth and teeth and the mechanism of formation of the basic organic material for all layers of the tooth.
- 3. Oral Diseases Unit:** This department is concerned with diagnosing all oral diseases affecting the mouth, teeth, and face in general.
- 4. Dental Radiology Unit:** This specialty is concerned with taking external radiographs of the face, jaws, and teeth and is concerned with how to examine and diagnose them

Hospital University /Forth Stage Clinic

Dental Treatment Branch

Assistant Prof. Dr. Huda Abbas Abdullah

One of the most important branches of the College of Dentistry, where students are taught and trained to perform various types of fillings, crowns and bridges to replace damaged or missing teeth. This is done in several stages. The third stage is pre-clinical, in which the student is trained to restore teeth on phantom heads before performing them on patients. In the fourth stage, the student moves with his acquired experience to the teeth of the patients and applies what he learned in the previous stage. In the fifth stage, the student continues to perform what he learned in the previous stages, while performing some of the most complex and difficult cases under the supervision of specialized instructors in the educational clinics affiliated with the college.

Subspecialties of the Dental Treatment Branch

Dental Restoration: Treating cases of decay and removing and placing fillings of all types (amalgam and light) Root Fillings: If the decay reaches the pulp of the tooth, the tooth nerve is removed and the damaged part is replaced with fillings.

Crowns and bridges: In the event of a large part of the tooth being lost, it is replaced with a crown, and in the event of a tooth or several teeth being lost, they are replaced with a fixed bridge.

Teaching Staff

Dental Treatment Laboratory (Phantom)

Oral and Maxillofacial Surgery

Branch Head of the Branch / Assistant Prof. Jamal Khader Mahmoud

This branch seeks to train and qualify the student in the following fields

1- Tooth extraction and surgical extraction

2- Diagnosis and treatment of various pathological conditions by surgical methods

3- Dental implants

4- Laser surgery.

5- Treatment of diseases of the temporomandibular joint, salivary glands and facial nervous system

6- Lifting tissue samples.

7- Early diagnosis of malignant and benign maxillary and facial tumors.

8- Diagnosis and treatment of some congenital birth defects such as (cleft lip).

**Operating / Surgery Branch
Room**

Head of Orthodontics, Prevention and Pediatric Dentistry branch

Assistant Prof. Maha Isam Abdulaziz
Orthodontics, Preventive and Pediatric Dentistry Branch

the branch seeks to provide a high level of training in clinical dental sciences by developing the skills of faculty members to keep pace with the latest developments in scientific research and teaching methods and improving teaching methods and techniques through continuous development and keeping pace with developments in curricula using modern methods keeping pace with international standards and providing modern technology in equipment to work on providing the appropriate requirements for the educational process, scientific research and patient treatment. Cooperating with other scientific branches in the college to support various educational and research programs and provide treatment services to the community.

The branch consists of Two units concerned with clinical studies, which are:

1-Pediatric Dentistry Unit: This department is concerned with diagnosing all diseases that affect children, such as caries, gum diseases, and periodontal diseases.

2-Orthodontics Unit: This department is concerned with diagnosing all dental diseases that affect the correct occlusion in children and adults and treating these obstacles by using removable braces for patients by students and also using fixed braces for patients by doctors.

Teaching Staff

Subspecialty	General Specialization	NAME
Master of orthodontics	Bachelor of dental medicine and surgery	Jamal Khdher Mahmoud
Master of orthodontics	Bachelor of dental medicine and surgery	Maha Issam Abdulaziz
Master of preventive dentistry	Bachelor of dental medicine and surgery	Azhar Ammash Hussain
Master of orthodontics	Bachelor of dental medicine and surgery	Anas Khahtan Hamdi
Master of preventive dentistry	Bachelor of dental medicine and surgery	Hind Thiab Hamed
Master of preventive dentistry	Bachelor of dental medicine and surgery	Suhaib Kais Alwan
Master of pediatric dentistry	Bachelor of dental medicine and surgery	Aseel Taha Khdher
Master of pediatric dentistry	Bachelor of dental medicine and surgery	Russul Saad Ahmed
Master of pediatric dentistry	Bachelor of dental medicine and surgery	Hala Thamer Zidan

Basic Sciences Branch

The branch is one of the scientific branches that qualifies students of the College of Dentistry to receive and consolidate the basic sciences necessary and complementary to the specialized medical sciences. This is done through specialized scientific and medical cadres full of knowledge and ethics.

The branch has developed a strategy that aims to provide distinguished, high-quality knowledge material in the field of sciences related to dentistry, taking care of the basic scientific research methodology and its sources, thus enabling the student to acquire the necessary scientific and applied knowledge and skills that are positively and effectively reflected in serving the community through the channels of health and research institutions, consultations and postgraduate studies.

The branch includes the following units:

1- General Anatomy and Dental Anatomy Unit.

2- Medical Chemistry and Biochemistry Unit.

3- Physiology Unit.

4- Human Rights and Democracy Unit.

5- Internal Medicine Unit.6- General Surgery Unit.

7- General Diseases Unit.

8- Drugs Unit.

9- Medical Physics Unit.

10- Microbiology Unit.

11- Medical Biology Unit.

12- General Histology Unit.

13- Computer and Informatics Unit

Skills of Assistant Dean For Scientific Affairs

- 1- Responding to all letters received by the Office of the Assistant Dean for Academic Affairs.**
- 2- Signing documents.**
- 3- Following up on students' affairs, meeting them, listening to their requests, and overcoming the difficulties they face.**
- 4- Issuing internal and external letters related to the academic assistant.**
- 5- Supervising the departments affiliated with the Assistant's Office such as the Department of Academic Affairs, Graduate Studies, Planning and Follow-up, Quality Assurance and University Performance Department, Registration**

Skills of Assistant Dean For Administrative Affairs

The tasks of the Office of the Assistant Dean for Administrative Affairs are to follow up the work of the administrative departments associated with it, which are:

- 1- Human Resources, Accounts, Administration and Services, Warehouse Unit, Maintenance, Legal Department**
- 2- Follow up the affairs and attendance of the college members from technical and administrative employees.**
- 3- Follow up the reconstruction affairs associated with the engineering department and projects at the university from restoration, demolition and construction work.**
- 4- Follow up on classrooms and educational supplies.**

Tikrit Journal Of Dental Sciences

A semi-annual peer-reviewed scientific journal concerned with publishing research related to dental specialties. The journal is accredited for scientific promotion and has an international standard number ISSN (2073-1213) Deposit number in the National Library and Archives (1856) for the year 2013
